Aar Coat

Aar Coat

Aarka AAR Coat is a limestone product that adds a rustic flair and an age-old charm to your space. Lime wash is known to be the oldest paint used by man. It has endured the test of time both physically and aesthetically. Our mineral based coat is environment friendly, non-toxic and emits zero VOCs. It is naturally breathable, allows moisture to escape and is also mold and mildew resistant. On application, AAR Coat creates a smooth or chalky, nuanced texture that resembles luxurious suede and this feel only gets better with time. Add depth and luminosity to flat walls by using this coat in thin translucent layers to give a mesmerizing iridescent finish. AAR Coat is ideal for building durable and beautiful exterior or interior finishes. AAR Coat is also recommended for sustainable new-build projects for both exterior and interior surfaces. AAR Coat can be finished with our Aarka Protective Top Coats to achieve Matt, Semi Matt, Gloss or High gloss finish, as desired. Smooth to rough versatile finishes can be created by AAR Coat known as: Venetian or Lime Plaster, Lime Surface Coatings, Lime Plastering, Marmarino finish or Smooth Concrete finishes.

Lime Concrete Smootheffect

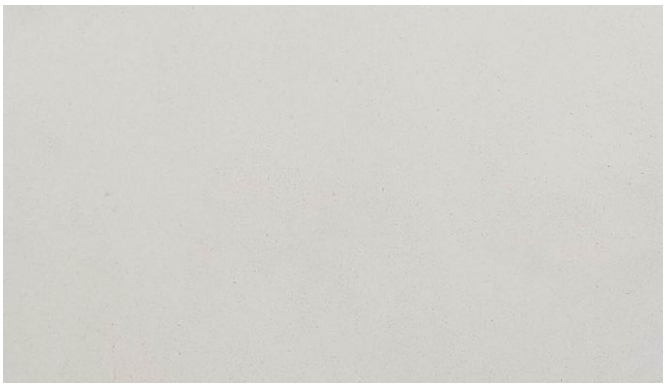

Base Coat : Quartz base Top Coat : ACLC13-03 Protective Coat : Aarka PU (APUG)

This texture is achieved by applying multiple layers of Aar Coat LC-13, which are then burnished or polished to create a smooth, even surface. This finishes often have a matte or slightly chalky appearance, which contributes to their unique visual appeal.
