Application process

Start by ensuring the wall surface is clean, dry, and free of dust or loose particles. Mix glitter particles into the Lumi paste, diluting it with 5-15% water for smooth application. Use a clean brush and apply a thin layer with short criss-cross strokes to distribute the glitter evenly. Run a roller over the wet layer to smoothen the surface. Avoid overloading the brush for a balanced finish. Allow the surface to dry for 6-8 hours, depending on weather conditions, for best results.
