- *Premium decorative coatings*

Cimento

Cimento

Aarka Cimento is a sand based acrylic paste. It creates a textural effect of seamless concrete, similar to that of Venetian plaster. Aesthetically, this hand-applied paint is the perfect alternative to exposed concrete walls and can be applied to any space from bathrooms to kitchens, to commercial spaces. This concrete finish on walls offers a versatile and contemporary design option. It can be applied to both interior and exterior spaces, ranging from residential homes to commercial buildings. It can be used to recreate the modern, pitted, raw look reminiscent of New York Lofts, which is more about the sophistication of subtle shading. Cimento is an easy, eco-friendly way to add a tactile focal point to your room or to create an aged accent wall. Cimento on walls can provide an urban, minimalist vibe or serve as a neutral backdrop for other design elements and furnishings. Additionally, they can be complemented by various lighting techniques to highlight their texture and create dramatic visual effects.

Cemento

Concrete Slab effect

Base Coat : Cimento BD

Top Coat : AMD-16

Protective Coat : Aarka PU

Concrete effect on walls offers a versatile and contemporary design option. It can be applied to both interior and exterior spaces, ranging from residential homes to commercial buildings. Concrete walls can provide an urban, minimalist vibe or serve as a neutral backdrop for other design elements and furnishings

Cemento

Concret effect

Base Coat : Cimento BD

Top Coat : AMD-37

Protective Coat : Aarka PU

Concrete walls can be finished in different ways to achieve the desired effect. A rougher finish maintains a more raw and industrial look.
