Cimento

Aarka Cimento (ACM) is a sand based acrylic paste. It creates a textural effect of seamless concrete, similar to that of Venetian plaster.

Aesthetically, this hand-applied paint is the perfect alternative to exposed concrete walls and can be applied to any space from bathrooms to kitchens, to commercial spaces. This concrete finish can be used to recreate the modern, pitted, raw look reminiscent of New York Lofts, which is more about the sophistication of subtle shading. Cimento is an easy, eco-friendly way to add a tactile focal point to your room or to create an aged accent wall.

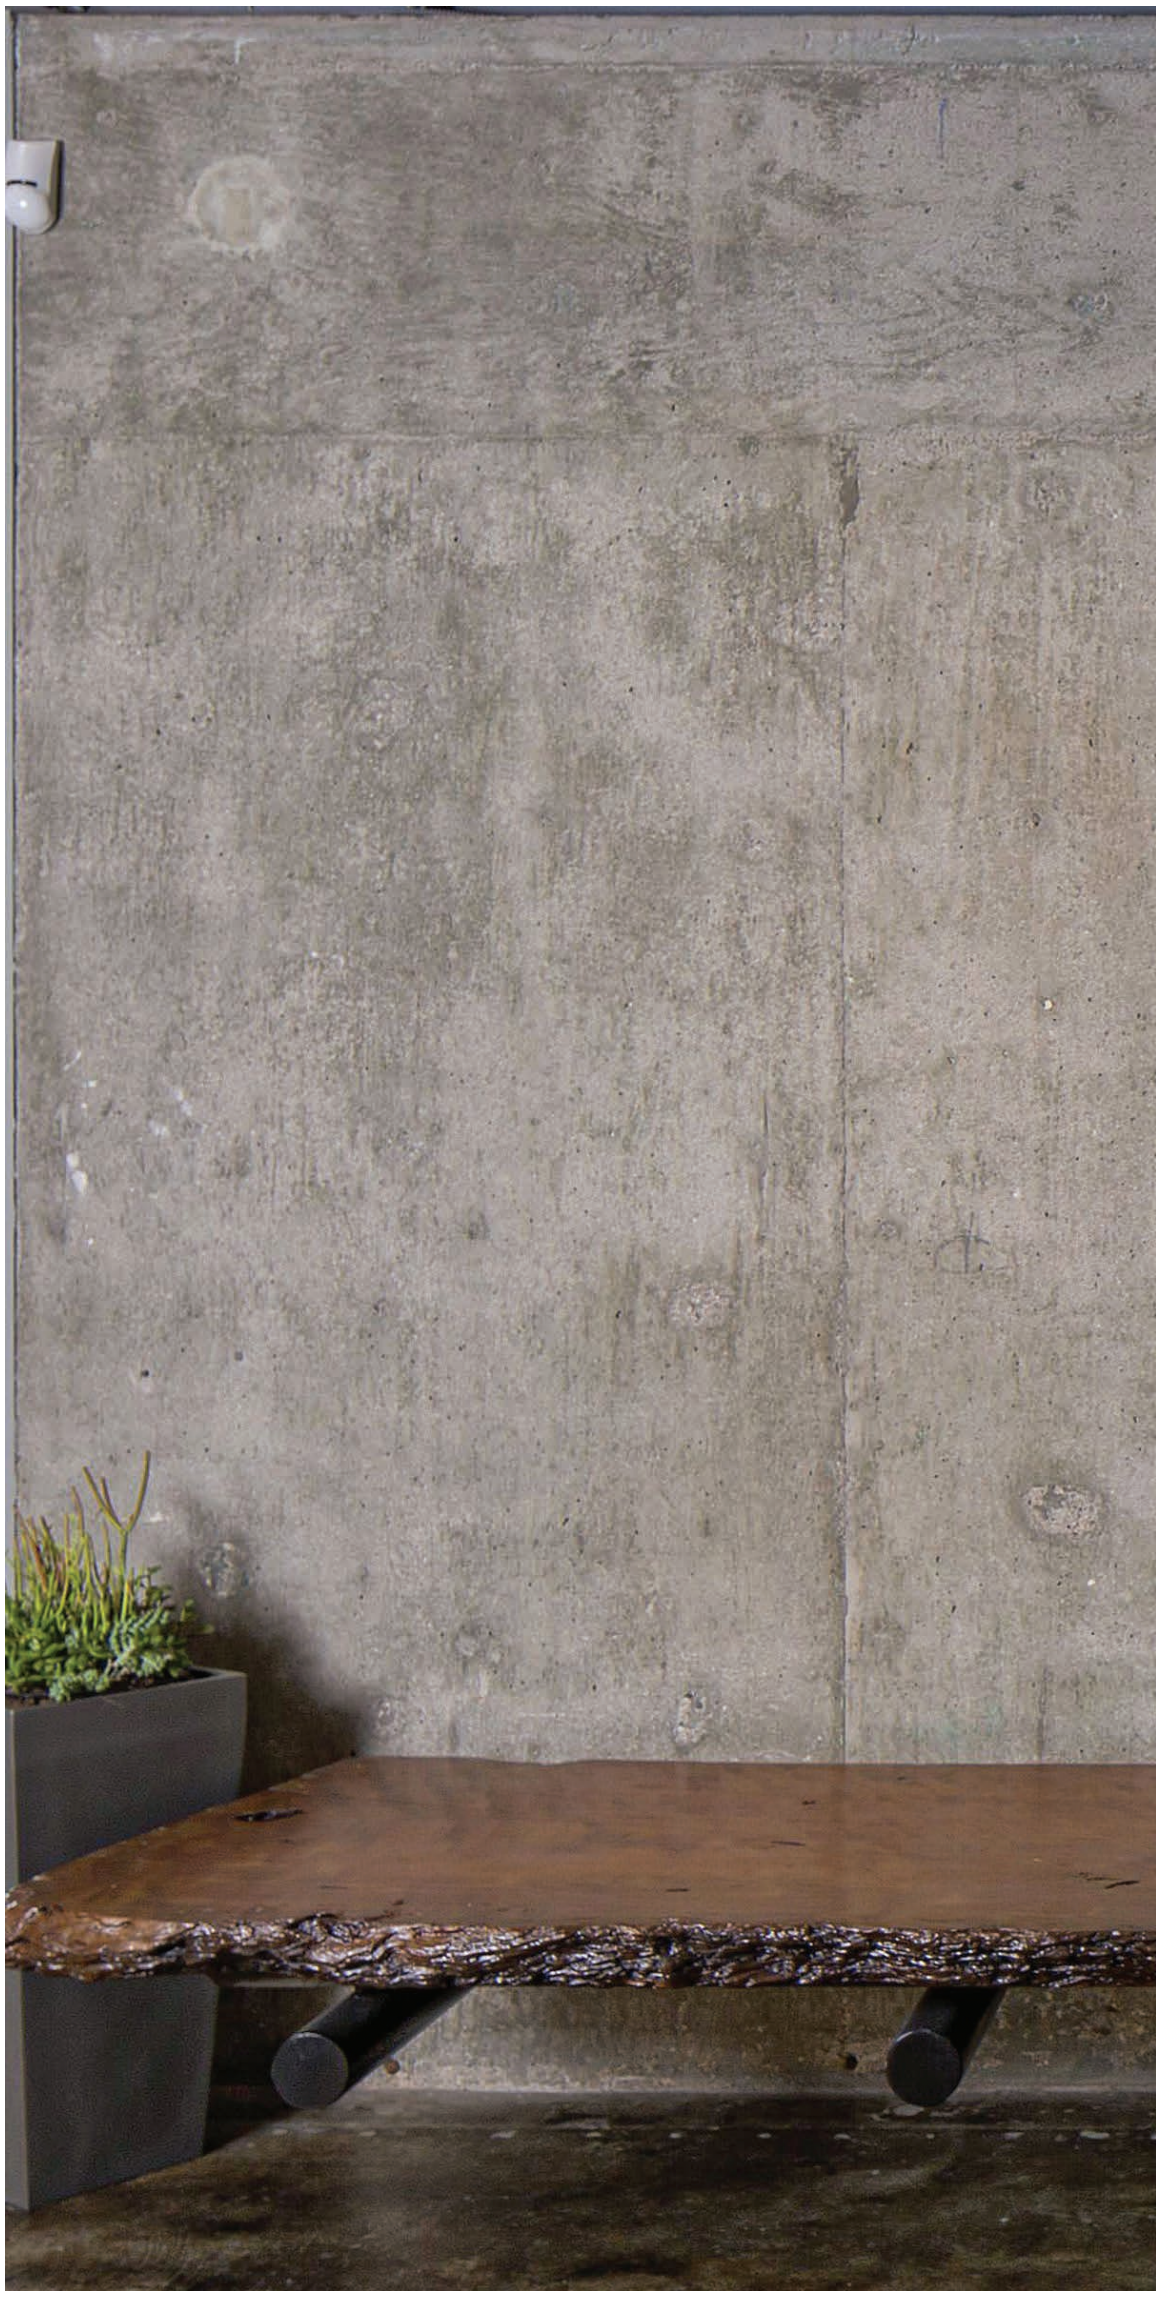

Application:
Aarka Cimento is a ready to use paste. Water can be added if required for ease of workability. Numerous effects can be created with various rollers and trowels.
