Exterior Stucco

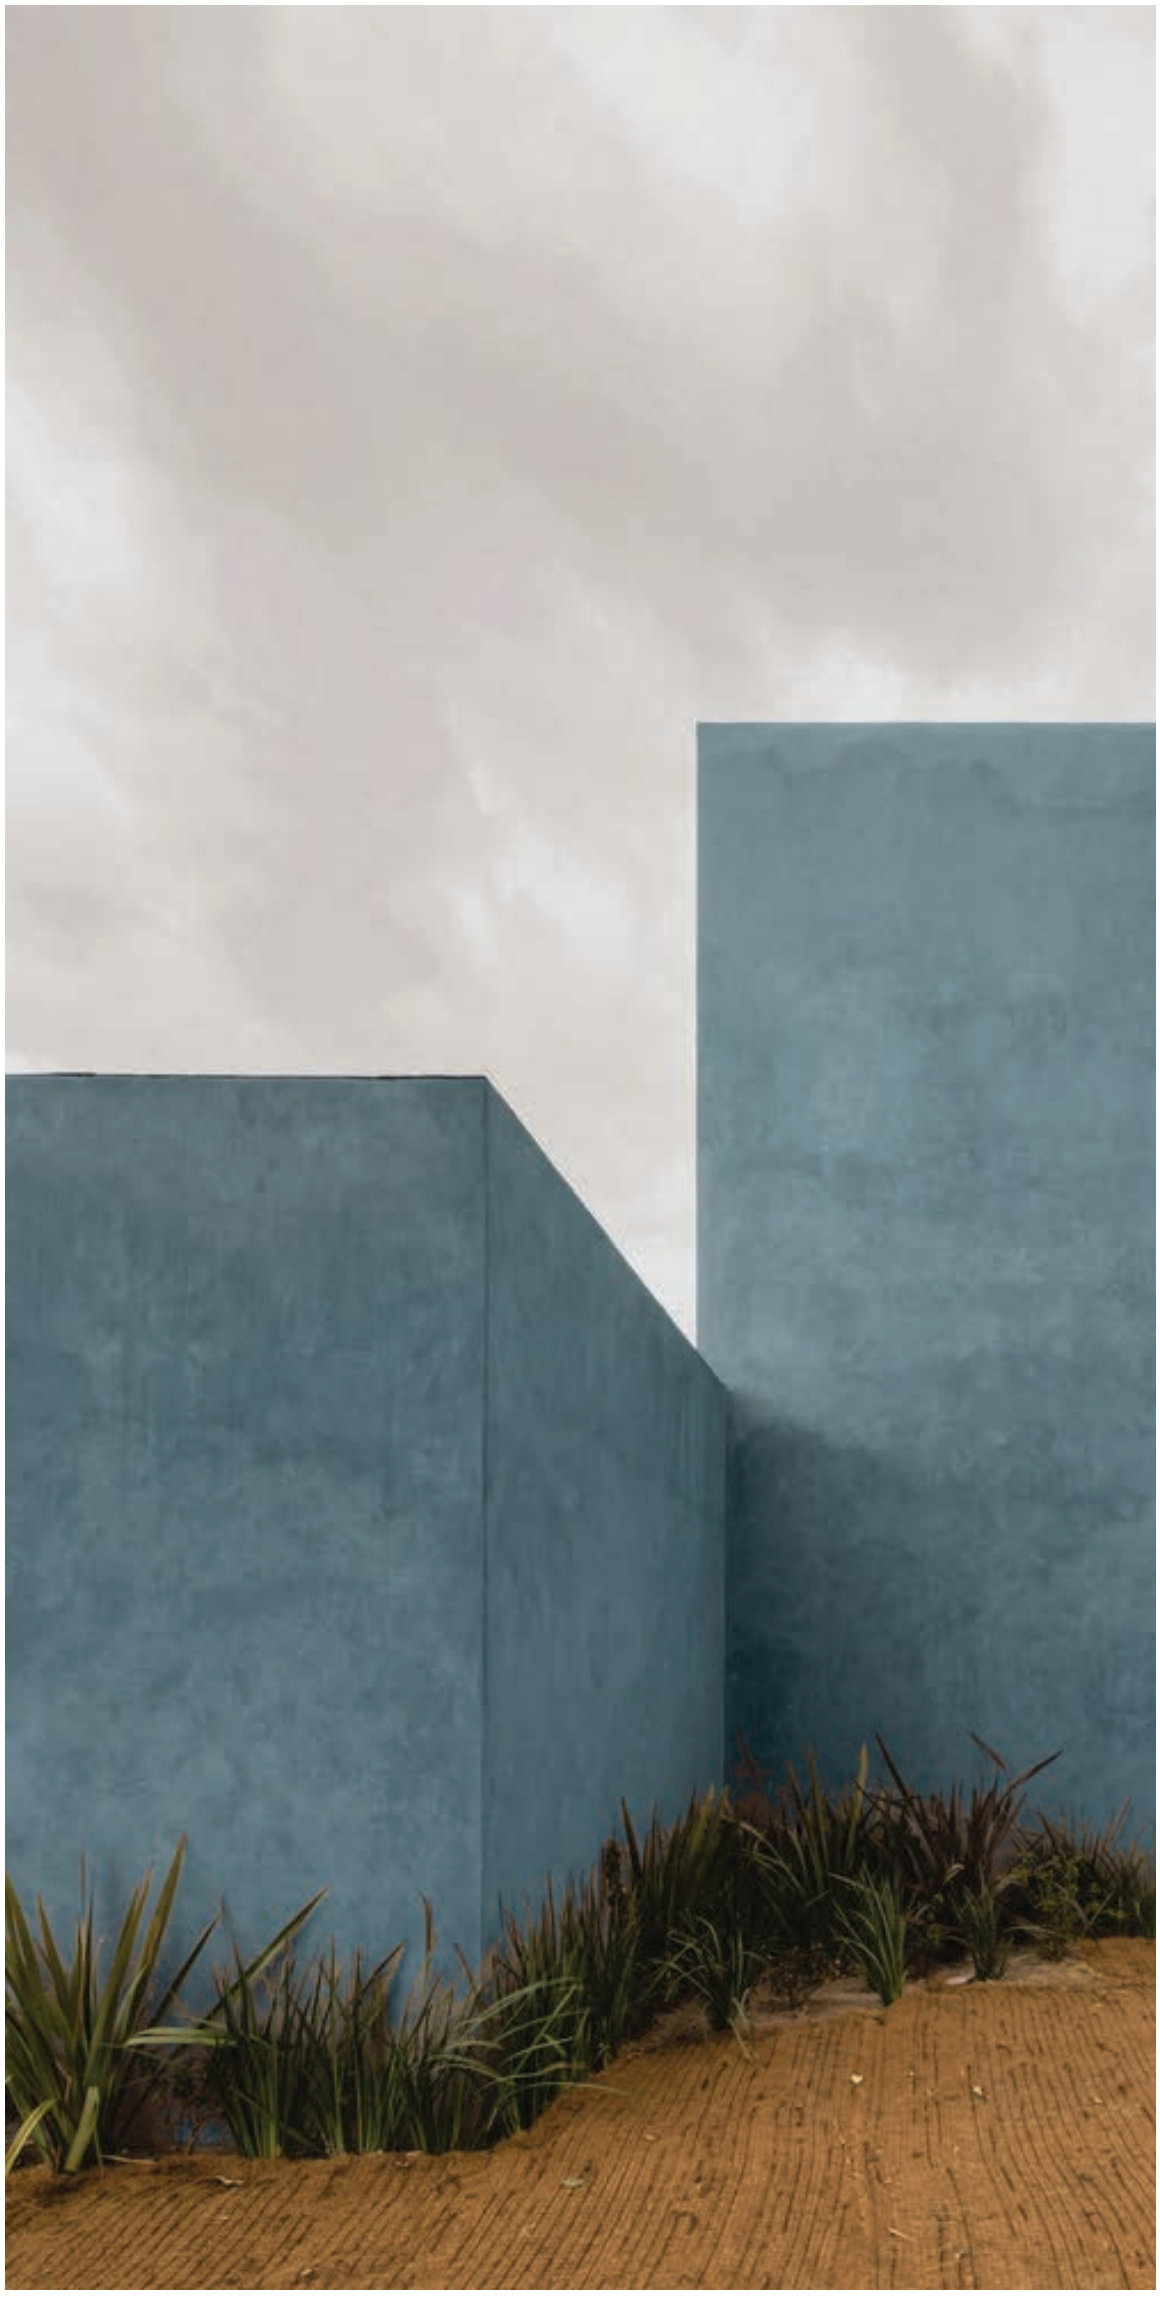

Aarka Exterior Stucco (AMBE) is the optimal lime based product to create finishes inspired by marble and other stone surfaces for exterior walls. This lime-based stucco creates a polished plaster effect with the illusion of depth and texture.

Our stucco provides a hard, durable, weather-resistant outer surface to protect your home from the elements. It creates a bold, raw finish that elevates the look of your exterior walls. This stucco product can be coloured and therefore combines well with other types of exterior cladding.
AARKA Exterior Stucco is ideal for durable and beautiful exterior or interior walls. Aarka Texture Bubbles can be finished with our Aarka Protective Top Coats to achieve Matt, Semi Matt, Gloss or High gloss finish, as desired.
Smooth to rough versatile finishes can be created by AARKA Exterior Stucco known as: Venetian or Lime Plaster, Lime Plaster Fine Stucco or Stucco Plaster.

Application:
Make a homogenous mixture by adding water, to achieve the desired consistency. Numerous effects can be created with trowels.
