Marbre Ciceo

Aarka Marbre Ciceo (AMBC) is a lime base paste suitable for interior walls and ceilings, to give a finish that looks like polished marble or granite.

Marbre creates a highly polished, rock-hard, marble-like finish. Marbre is especially useful on columns, corbels, and curved walls. Marbre can be tinted, or colored using universal colorants.
The natural feel, texture and colours of natural marble / granite have been in vogue since the first time they were used by great empires to built cities and classical monuments. Marble and granite have been a luxury of favored few, and Marbre breaks the barrier. Marbre – the Venetian stucco closely follows the same legacy of feel, looks, textures and colours.
Its simplicity to apply and amazing finish makes Marbre a legendary product for offices and homes. Come fall in love to the beautiful contemporary and traditional looks of Marbre. The creative luxury bounds on limit with Marbre, experiment with it to explore the creative side of you.

Application:
Marbre is applied over a primer or basecoat, from one to four layers if required. Marbre is applied and buffed with a specialized Aarka Steel Trowel to a smooth glass-like sheen. For larger areas buffing is eased by the use of buffing machine.
